

BashMatic® Auto-Generated Usage Documentation

Index

- [is-dbg\(\)](#)
- [dbg\(\)](#)

is-dbg()

Checks if we have debug mode enabled

dbg()

Local debugging helper, activate it with DEBUG=1

Index

- [section\(\)](#)

section()

Prints a "arrow-like" line using powerline characters

Arguments

- = @arg1 Width (optional) — only interpreted as width if the first argument is a number.
- = @args Text to print

Index

- [PATH_add\(\)](#)

PATH_add()

This function exists within direnv, but since we are sourcing in .envrc we need to have this defined to avoid errors.

Chapter 1. osx.sh

1.1. Overview

OSX Specific Helpers and Utilities

Chapter 2. lib/shdoc.sh

Helpers to install gawk and shdoc properly.0

2.1. Overview

see `${BASHMATIC_HOME}/lib/shdoc.md` for an example of how to use SHDOC. and also [project's github page](#).

Chapter 3. is.sh

3.1. Overview

Various validations and asserts that can be chained and be explicit in a DSL-like way.

3.2. Index

- [is-validations\(\)](#)
- [whenever\(\)](#)

3.2.1. is-validations()

Returns the list of validation functions available

3.2.2. whenever()

a convenient DSL for validating things

Example

```
whenever /var/log/postgresql.log is.an-empty-file && {  
    touch /var/log/postgresql.log  
}
```

Chapter 4. util.sh

4.1. Overview

Miscellaneous utilities.

Chapter 5. Bashmatic Utilities for PDF file handling

5.1. Overview

Install and uses GhostScript to manipulate PDFs.
